

Ziad Hamdy Mohamed

Cairo, Egypt — +201128079429 — ziadhamdymansour@gmail.com — [LinkedIn](#) — [GitHub](#)

PROFESSIONAL SUMMARY

Mobile Application Developer with **3+ years** of experience building and deploying full-stack mobile applications. Specialized in **React Native** for cross-platform development, with strong expertise in **Redux** and **Redux Thunk** for efficient state management and asynchronous operations. Experienced in **PHP** backend development, database design, and performance optimization, enabling delivery of reliable, high-performance mobile solutions. Proven track record in app publishing and release management on **Apple App Store** and **Google Play Store**, with a strong understanding of React Native architecture, performance optimization, and best practices for scalable, maintainable applications.

EDUCATION

Faculty of Computers and Information, Tanta University

2019 – 2023

Bachelor's Degree in Computer Science

Tanta, Egypt

- GPA: B+ with Honors
- Relevant Coursework: Algorithms, Data Structures, Database Systems, Software Engineering, Object-Oriented Programming.

WORK EXPERIENCE

React Native Developer

December 2025 – Present

O-Projects

Cairo, Egypt

- Developed and maintained production-grade React Native applications used by **10K+ users**, delivering stable cross-platform experiences on iOS and Android with **99%+ crash-free sessions**.
- Designed and implemented high-performance React Native architecture applying performance optimization techniques and scalable state management for fast, reliable, and maintainable apps.
- Led cross-functional collaboration with product managers, designers, and backend engineers to deliver **20+ business-aligned features**, reducing delivery time by **30%**.
- Integrated **15+ third-party APIs and services** (payments, maps, notifications, analytics), increasing user engagement by **25%**.
- Implemented secure authentication flows and optimized state management, reducing API calls by **40%** and improving app load time by **35%**.
- Applied performance solutions including memoization, efficient rendering, optimized navigation, and network optimization to ensure smooth UX across devices.
- Wrote unit and integration tests, improving release reliability and reducing production bugs by **30%**.
- **Key Projects:** Frontiers Events, Beann & Bun, Cashato Delivery, Cashato Collector.

React Native Developer

August 2022 – November 2025

Camp Coding

Tanta, Egypt

- Developed and maintained full-stack mobile applications using **React Native** (frontend) and **PHP** (backend), serving thousands of active users.
- Led cross-functional development teams through the complete software development lifecycle – from requirement gathering to deployment.
- Integrated third-party APIs including payment processing, real-time updates, and data synchronization.
- Optimized **MySQL** database schemas and queries, improving application response times by up to **40%**.
- Designed and implemented secure authentication systems and role-based access control for sensitive user data.
- **Key Projects:** LABBEK, LASERJET Shop, Quest Med, Fouady, Camp Courses, Kidzenia, Game X, Mr. Dite.

CORE COMPETENCIES

React Native • Redux / Redux Toolkit • Cross-Platform Mobile Development • iOS & Android Publishing • REST API Integration • PHP Backend Development • MySQL Database Optimization • Secure Authentication • Performance Optimization • Unit & Integration Testing • Git & GitHub • Agile Methodologies

KEY PROJECTS

Cashato Collector & Cashato Delivery (O-Projects)

- **Overview:** Dedicated mobile apps for field collectors and agents. Manages daily assigned orders, mandatory tasks, and live map navigation for collectors, alongside a full customer-facing delivery experience.
- **Key Contributions:** Built complex state management flows with Redux Thunk; integrated live map navigation APIs; implemented settlement and performance analytics pages; ensured 99%+ crash-free sessions across iOS and Android.
- **Technologies:** React Native, Redux Toolkit, REST APIs, Map APIs, iOS, Android.

Frontiers Events (O-Projects)

- **Overview:** On-site event registration app that generates a personal QR code for each attendee; ushers scan the code to instantly produce an e-pass, eliminating manual check-in queues.
- **Key Contributions:** Implemented QR code generation and scanning pipelines; built offline-capable data sync; optimized rendering for high-throughput event entry scenarios.
- **Technologies:** React Native, QR Code APIs, Redux, REST APIs.

Beann & Bun (O-Projects)

- **Overview:** All-in-one dining and loyalty app enabling customers to browse the menu, place orders, and earn exclusive rewards, all from their smartphone.
- **Key Contributions:** Developed menu browsing, cart, and checkout flows; built loyalty points engine; integrated payment processing and push notification APIs.
- **Technologies:** React Native, Redux, Payment APIs, Notification Services.

LABBEK (Camp Coding)

- **Overview:** Global product marketplace connecting Egyptian users with international items for fast, direct doorstep delivery with an expanding international catalog.
- **Key Contributions:** Built full-stack app with React Native frontend and PHP/MySQL backend; implemented product browsing, request flows, and order tracking; optimized database queries to reduce load times by 40%.
- **Technologies:** React Native, PHP, MySQL, REST APIs.

Smart Shelves Tracking System (Graduation Project – IoT)

- **Overview:** End-to-end IoT system for real-time shelf monitoring in retail environments, combining embedded hardware with a companion mobile application.
- **Key Contributions:** Developed IoT firmware using Arduino and ESP8266 with HX711 weight sensors, PIR motion sensors, and servo motors; built the mobile app to receive and display shelf data transmitted via AT Commands.
- **Technologies:** React Native, Arduino, ESP8266, HX711, PIR Sensors, Servo Motors, AT Commands.

TECHNICAL SKILLS

Mobile Development: React Native, Redux, Redux Thunk, Redux Toolkit, React Navigation, Expo
Back-End Development: PHP, MySQL, RESTful API Design, Database Schema Optimization, Role-Based Access Control
Authentication & Security: JWT, Secure Auth Flows, Session Management, Data Encryption
Performance Optimization: Memoization, Lazy Loading, Efficient Re-rendering, Network Optimization, FlatList Tuning
Testing: Unit Testing, Integration Testing, Crash Monitoring, Release Management
Version Control: Git, GitHub, Branching Strategies, Code Reviews
App Publishing: Apple App Store (TestFlight, App Review), Google Play Store (Internal/Production Tracks)
Tools: Visual Studio Code, PowerShell, Postman, MS Office
Concepts: OOP, Algorithms, Problem Solving, Agile Methodologies, Time Management

CERTIFICATIONS

- **React Native & Redux:** Completed advanced training in cross-platform mobile development, state management, and performance optimization.

LANGUAGES

- **Arabic:** Native Speaker
- **English:** Professional Working Proficiency (Written and Spoken)
